Admission of visitor by self management

- The visitor will be able to carry out a quick search on the totem or touch screen of the sector or floor by ID or Name, Surname, cell phone using an Intelligent Grid presented on the screen.
- The system can display the elevator as a map or directions to the location you have selected.
- The visitor will see on the screen the elevator that he must take, in this way the entrance is speeded up.
- The system has a backend for the entry by hand of the Visitor individually or in Group, for reception desk / security person.
- The Form allows you to enter ID, Name and Surname, and take the photo of the visitor too.

Alert System between Visitor and Reception.

The system has an additional module to enable alerts and monitoring of people in the building during their visit, once the visit has been entered, the system triggers an alert to the device informing that your guest has arrived at the indicated device, totem, tablets, smartphones, among others , showing on the screen that the person entered or the expected order.

If this module is enabled, the person has 2 options: First it has to accept, so the visitor can be validated from reception and allowed to enter, or Decline the visit and make comments if required because it was denied.

STEPS of Admission of visitor by self management

Validation by visit totem or delivery

The visitor or delivery company looks for the apartment on the totem screen and choose the sector waiting for the approval of the entry.

Building entrance approval

The user receiving the visit as the security person, they can accept the visitor. The screen will show how to get to the place or which elevators they should take. In this way, check in to the building.

Meeting held or ended

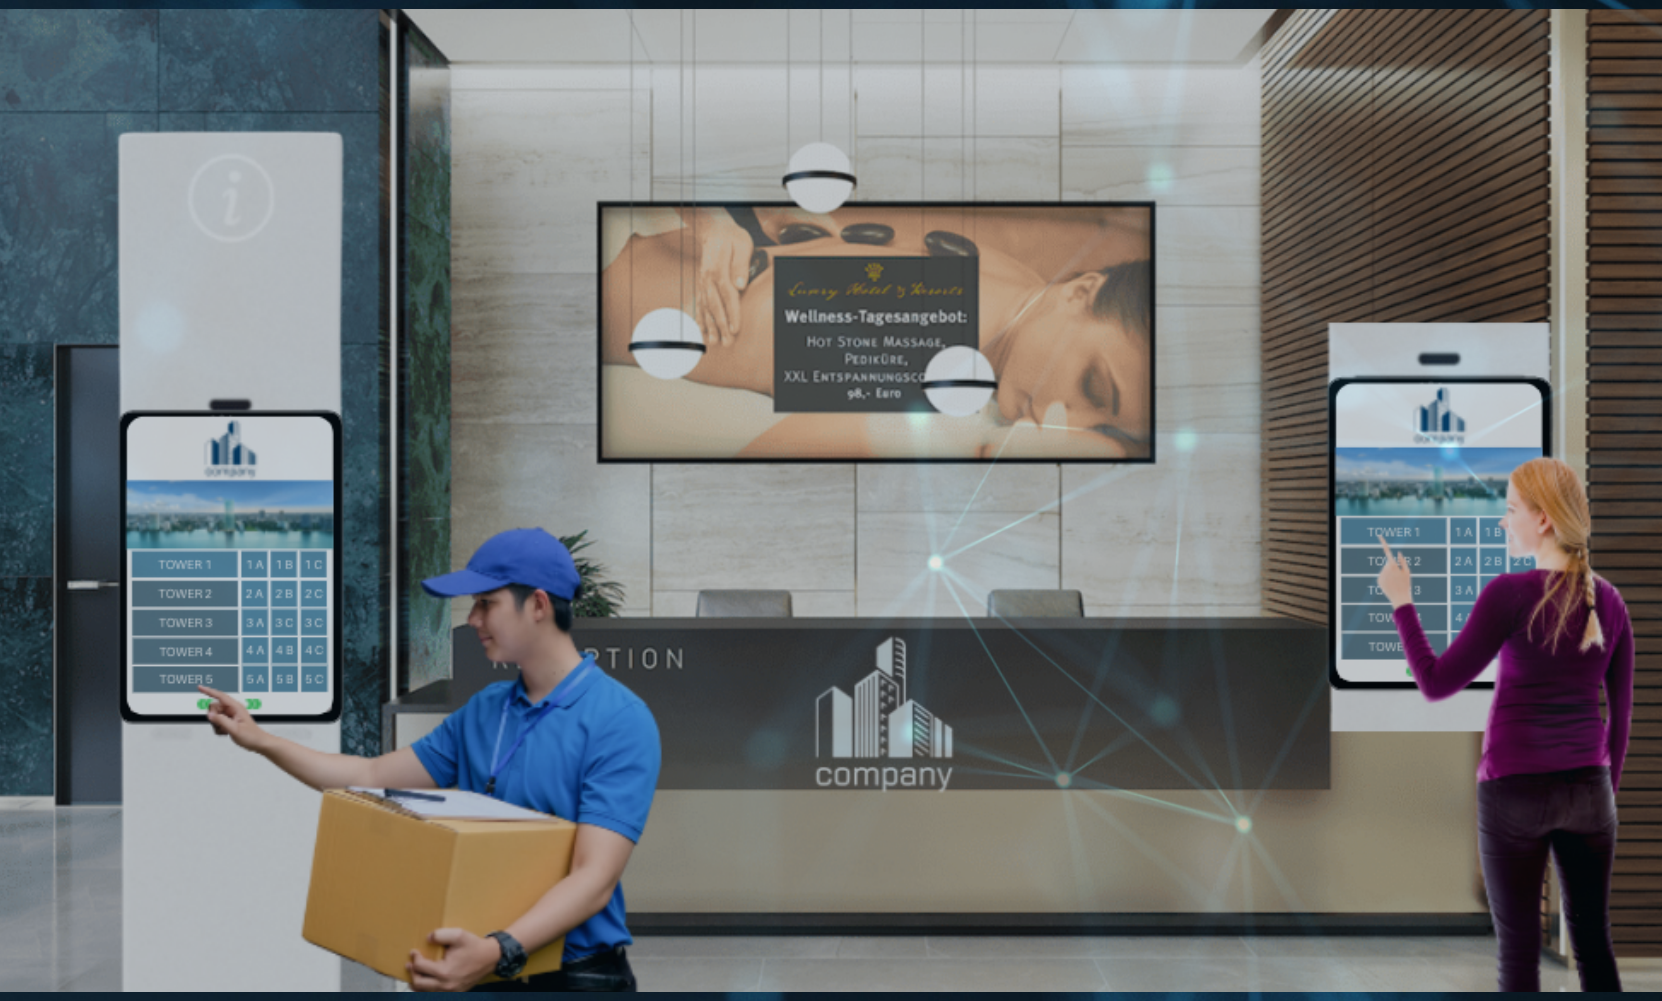
The person who receives the visit must give or validate the exit of the visitor to automatically register the people who entered the building.

Check out at reception

The system can take the greeting automatially or in case the building requires validating the exit, the person at the reception must check out.

Meeting held or delivery completed

Authorized persons have acces to the visitor portal at all times, where all income and expense are listed, such as the number of people and their data, if necessary.



THANK YOU SO MUCH !
